

If this looks crazy in the states...

America as the World - A Brief History:

Since 2001, War on Terror rages. Terrorists in Kentucky and the gulf states execute suicidal plane attacks into Sacramento and Eureka, California. The Golden State retaliates and invades central Kentucky. In 2003, the California Governor declares Louisiana and northern Minnesota an axis of evil, then invades New Orleans to overthrow a brutal dictator for his alleged weapons of mass destruction. East Louisiana spirals into civil war. The California governor sends drones into east Tennessee to destroy terrorists sheltered by the Christian Taliban. A dictator in west Louisiana warns he will annihilate Bay County in Florida's west panhandle as war weary refugees flee across the gulf from the horrendous civil war in Jackson County Florida with over 400,000 casualties. N Minnesota threatens nuclear attack on Los Angeles and Sacramento. Fanatics rise in east Louisiana and Jackson County Florida declaring a Christian theocracy to rule the gulf. Third world poverty ravages the Midwest as climate extremes menace populations from coast to coast. Civil wars and genocide have haunted the plains and Rockies for decades. The Carolinas and north east Tennessee narrowly avoided nuclear war and before that, California, Montana and Alaska came close to destroying the continent with their deadly arsenals. Every state spends a collective trillion dollars a year preparing for the next continental war which they believe can be won with weapons of mass destruction. Concerns over a new Cold War are raised across the North East and West Coast as New England and California issue sanctions and break ties against Montana and Alaska for their invasion and occupation of Cleveland, Ohio. When a reality TV star is elected governor of California, tensions mount in a trade war with Washington. Immigrants are demonized and construction begins on a giant wall to separate California from Arizona and Nevada. The governor threatens war after killing a top general in a deadly Central Louisiana drone strike.

IMAGINE IF THE WARS ESCALATE:

A pandemic explodes across the continent causing tensions between states to escalate and poverty to skyrocket. Montana and Alaska invade west Pennsylvania and northern West Virginia as terrorists attack Bay County causing its retaliation. The new Democrat Governor of California fails to thwart the rise of right wing extremism across the continent. A religious extremist wins the race for next Governor as mass protest and civil disobedience are crushed by the new fascist police state. Martial law is declared in California as a military buildup surrounding west Louisiana is launched. Bay County's aggression increases as Panama City Beach and Youngstown, Florida are invaded. • California wages nuclear war with N Minnesota while failing to pull out forces from Kentucky as they return for the fight in east Louisiana. • Bay County and California launches preemptive war on west Louisiana to destroy their nuclear program. • Christian fanatics overthrow east Tennessee's government to seize control of their nuclear arsenal. • A bloody revolution explodes through Alabama and Mississippi, leading to spikes in oil prices and triggers the continental economy to collapse in another great depression. • A militant Christian alliance forms against, New England, California and Bay County, Florida. • In a dramatic religious revival, church and state merge in California. The governor crowns himself emperor with mega-church pastors declaring the continent in the End Times and the return of Christ immanent. Violence escalates into nuclear terrorism. • Millions die in a nuclear war. • A cosmopolitan movement rises from the ashes of a post apocalypse to bring the states together while initiating an era of secular renewal. • Tensions rise across the continent over control of refineries in the gulf states. • A power sharing deal is reached with Washington and Anchorage. • Celebration of peace is short lived with much of the continent in ruin. • Devastating impacts intensify through nuclear winter, crop failures and millions of climate refugees. • What is left of America is haunted by failing to prevent the nightmare. Civilization must be rebuilt and a new dark age endured. A future with a United States in peace and prosperity is eventually attained but only after hundreds of years painfully correcting the terrible mistake of waging war against yourself.

...why would it be acceptable among the nations?

A BETTER WORLD IS POSSIBLE!

2020 - 2028 • A world wide pandemic explodes across the planet, with around 15X more dead than all American war casualties combined. Russia invades Ukraine. Israel is attacked by Hamas as war rages in Gaza. • As new Cold War tensions skyrocket, World Citizens mobilize in every nation by their revulsion of new carnage, refusing to see it escalate into a Third World War. A movement of renewed peace activism and unity inspires every government. In the face of unprecedented challenges, a new blueprint for building a United Federation of Nations through means preexistent in the ends, is embraced on every continent. • America ceases all military misadventures and withdraws its forces from Iraq and Syria as troops return home. All drone strikes end. • Non-violent revolution explodes across Russia to end the Ukraine War, remove Putin from power and restore democracy. NATO and the US pull away from the brink of war with Russia and China. • The Military Industrial Complex begins the process of retooling their weapons factories for the much more rewarding work of bringing humankind together in pursuit of space exploration. • The Prison Industrial Complex is dismantled. • NASA lands the first women astronauts on the moon with the first return trip since 1972 • Democratic restructuring of the United Nations Security Council to reflect the balance and ideals of true Democracy. Or a new global parliament is created, capable of rising up to the daunting challenges at hand. • Freed up resources from the wars are now available for greater science and technology education and advancement. New breakthrough solar cell technology is discovered, as the first solar powered electric automobile with a battery range of over 1,000 miles, is mass

produced. • The Solar Age commences. • Sick of the endless wars, Israelis and Palestinians sign a peace deal and tear down the walls as the two states merge into one as first state and cornerstone for a future United States of Earth. • Religious fanatics prophesying Biblical and Quranic apocalypse are denied. • The Star Trek timeline of WW3 starting in 2026 becomes fiction. • Billions of jobs created for the transition from the oil to solar age. - **2029 - 2034** • Space X sends the first cargo and manned mission to Mars. • Every man and woman on the planet is equipped with a solar powered, credit card sized quantum computer connected to an A.I. super intelligence on a global Internet as universal translator and passport to world citizenship. • A new era of mass leisure and cleanup commences around Earth as super A.I. frees humanity from repetitive labor intensive jobs. An army of humans and robots are mobilized in every nation to clean the trash and plastic debris littering our planet. • Assembly begins on a starship in Earth orbit slightly smaller than the USS Enterprise from Star Trek. Scientists from all nations join together on this international collaboration. • Nuclear disarmament. • Vatican City is the last state to join the newly established United States of Earth. • Environmental destruction and global warming reverse as millions of gas powered vehicles are recycled. • Earth's first planetary starship is completed and embarks on its first mission to the moon. At the start of 2035, this ship will be sent on humanity's 2nd three month manned mission to Mars. - **2035 - Forward** • Humanity is now free to explore the universe without danger of self-destructing.
